Austin, TX - May 8, 2006 A truth startling enough to shock the world has had time enough to brood-- people are waking up in record numbers to the real role the government may have played in the 9/11 attacks.

Now Austin-based nationally syndicated radio host and documentary filmmaker **Alex Jones**, with the help of prominent scholars, government insiders and fellow filmmakers, is bringing the inquiry of 9/11 into the absolute spotlight with a monumental conference set for June 24 & 25 in downtown Los Angeles.

"9/11 + The Neo-Con Agenda" Symposium will further bring the public and media into the "know" about what is really going on behind the most precipitous events of recent history.

The first ever *American Scholars Symposium* promises to be a show-stopper with high-profile guest speakers such as Former Head of the Star Wars missile defense program **Bob Bowman**, Brigham Young University physics professor **Steven E. Jones** (who posits that the WTC towers were brought down by pre-positioned demolition explosives), founder of the Scholars for 9/11 Truth Professor **James Fetzer**, as well as critical author **Webster Tarpley** (*9/11: Synthetic Terror*).

This momentous event will also feature the premiere of Alex Jones' latest, a documentary he has been quietly working on regarding the government-sponsored terror surrounding the 7/7 London bombings. Also screening at the symposium will be the viral-web hit, *Loose Change* by director **Dylan Avery**, which has created a great deal of attention about 9/11 amongst youth sectors. The conference will screen several other films, including Alex Jones' powerful *Martial Law 9/11: The Rise of the Police State*.

"9/11 + The Neo-Con Agenda" is the latest crescendo in the larger movement for 9/11 truth, which is gaining momentum and exposure. This will be the largest conference of its kind to date-- all the key players will putting their heads together with members of the public and the media to consider strategies for combating disinformation in the post-9/11 world.

More high-profile speakers, guests and film events will be announced as the June 24-25 conference draws nearer. The *American Scholars Symposium* is sure to be a huge catalyst in informing the public and getting the right minds talking, thinking, doing.

Criticism of the Neo-Con Agenda is not new, but the microscopic eye on the events of 9/11 is growing in magnification. As more of the public wake up to the scope of the truth, there are questions to be answered, dialogues to play out and history to uncover.

The Symposium invites members of the public and mainstream **media** alike to join in asking questions-- only an open mind is required to take away a great deal from this fantastic event.

If you only attend one 9/11 event, make sure this is the one. Come to learn, come to share and come to be empowered against the dark agenda of the Neo-Cons and the New World Order.
